SUMMARY

Fourth-year Computer Science student at the American University of Bahrain looking for a software development or technology internship. Strong foundation in programming, databases, and problem-solving, with experience working in fast-paced environments requiring teamwork, communication, and customer interaction. Motivated to apply technical skills to real-world projects and continue developing as a software engineer.

LANGUAGES

Fully fluent and conversational in:

- Arabic
- English
- French
- German

WORK EXPERIENCE

Game Development Intern - Natsume Atari **Jul 2026 - Sep 2026**

Junior Systems Developer - Heston Auto Services **Dec 2025 - Present**

- Designing and developing a database management system to organize customer records, vehicle information, service history, and appointments.
- Assisting in the development and maintenance of the company website.
- Implementing structured data storage and improving the efficiency of service record tracking.
- Gaining practical experience in database design, system development, and real-world software deployment.

RELEVANT PROJECTS

UniPool – University Ride-Sharing Mobile Application

Software Design and Engineering course project

- Developed the frontend interface for a university ride-sharing mobile application connecting student drivers and riders.
- Implemented user flows for ride posting, ride searching, seat booking, and ride tracking.
- Integrated the application with Firebase services for authentication, real-time database updates, and ride data storage.
- Presented the project during a university poster session, explaining the system architecture, features, and development process.
- Project Repository: https://github.com/alyamohamed1/UniPoolMobile

GateKeep – Cloud Security Access Control System

Cloud Computing course project

- Designed and developed a cloud-based access control system for managing user authentication and permissions.
- Implemented secure access mechanisms to protect cloud resources and services.
- Focused on identity management, security policies, and cloud architecture concepts.
- Demonstrated how organizations can control access to systems through centralized cloud security management.

EDUCATION

Bachelor of Science in Computer Science **Sep 2023 - Ongoing**
AMERICAN UNIVERSITY OF BAHRAIN
Relevant coursework in Software Development, Data Structures and Algorithms and Database Systems.

French Baccalaureate **Sep 2018 - June 2022**
LYCÉE FRANÇAIS INTERNATIONAL DE BAHREÏN
Specialized in Physics-Chemistry | Economy and social sciences | Science and Biology

Diplôme National du Brevet (DNB) **Sep 2017 - June 2018**
LYCÉE FRANÇAIS INTERNATIONAL DE BAHREÏN

TECHNICAL SKILLS

Programming Languages:

- Java
- JavaScript
- SQL
- HTML

Technologies & Tools:

- Git / GitHub
- VS Code
- MySQL / SQL Databases
- React Native
- Microsoft Azure

Concepts:

- Object-Oriented Programming
- Algorithms & Data Structures
- Software Design and Development
- Database Design
- Cloud Computing
- Problem Solving
